

Kwik-Kleen

GRAIN CLEANER

KWIK KLEEN allows you to clean your grain at harvest time. Clean grain dries and stores better, saving you time and money.

KWIK KLEEN is compact to fit in confined areas but large enough to keep up with most harvest conditions.

KWIK KLEEN has variable speed control and grain feed rate adjustment. Cleaning area is full circumference of tubes. The majority of cleaning is done on the sides and tops of tubes using centrifugal force.

KWIK KLEEN has a spring loaded hopper and easy-to-remove one-pin hitch that enables you to back cleaner up to grain storage bins to clean stored grain.

KWIK KLEEN can be used for sizing and separating certain grains.
